Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE

AMERICAN NATURALIST,

AN ILLUSTRATED MAGAZINE

OF

NATURAL HISTORY.

EDITED BY

A. S. PACKARD, JR., AND EDWARD D. COPE.

ASSOCIATE EDITORS:

PROF. C. E. BESSEY, DEPARTMENT OF BOTANY.
PROF. C. V. RILEY, DEPARTMENT OF ENTOMOLOGY.
PROF. O. T. MASON, DEPARTMENT OF ANTHROPOLOGY.
ELLIS H. YARNALL, DEP. OF GEOGRAPHY AND TRAVELS.
DR. R. H. WARD, DEPARTMENT OF MICROSCOPY.

VOLUME XV.

PHILADELPHIA:
PRESS OF McCALLA & STAVELY,
NOS. 237 AND 239 DOCK STREET.
1881.

Copyrighted 1881,
By McCalla & Stavely,
For the Proprietors.

CONTENTS.

The Ancient Glaciers of the Rocky Mountains . . . . . *Archibald Geikie* 1
The Discovery of Iron Implements in an Ancient Mine in North Carolina . . . . . *Frederick W. Simonds* . . . 7
On the Fertilization of Calamintha nepeta . . . . . *William Trelease* 11
Comparative Neurology . . . . . *S. V. Clevenger* 16, 103
Botanizing on the Colorado Desert . . . . . *Edward Lee Greene* 24
The Method of Distinguishing Species of Populus and Juglans by the young naked Branches . . . . . *W. J. Beal* 32
An Address to the Fossil Bones in a Private Museum . . . . . *James S. Lippincott* 37
Incomplete Adaptation as illustrated by the History of Sex in Plants . . . . . *Lester F. Ward* 89
A Partial Biography of the Green Lizard . . . . . *Sarah P. Monks* 96
A New Leaf Cutting Ant . . . . . *G. K. Morris* 100
The Bee's Tongue and Glands connected with it . . . . . *Justin Spaulding* 113
History of the Buffalo . . . . . *Wm. E. Doyle* 119
Observations on the Salmon of the Pacific . . . . . *D. S. Jordan & C. H. Gilbert* 177
The Siphonophores. [II.—The Anatomy and Development of Agalma—continued from p. 630, Vol. XIV.] . . . . . *J. Walter Fewkes* 186
The Relation of Apiculture to Science . . . . . *A. J. Cook* 195
Glacial Phenomena in the Yellowstone Park . . . . . *Wm. H. Holmes* 203
A Collector's Notes on the Breeding of a few Western Birds . . . *E. Holterhoff, Jr.* 208
The Fertilization of Salvia splendens by Birds . . . . . *William Trelease* 265
On the Origin of the Foot Structures of the Ungulates . . . . . *E. D. Cope* 269
Progress of Invertebrate Palæontology in the United States for the year 1880 . . . . . *C. A. White* 273
Evidences of the Effect of Chemico-Physical Influences on the Evolution of Branchiopod Crustaceans . . . . . *Carl F. Gissler* 280
Notes on a few of the Diseases and Injuries in Birds . . . . . *R. W. Shufeldt* 283
The Brain of the Locust . . . . . *A. S. Packard, Jr.* 285, 372
The Endocranium and Maxillary Suspensorium of the Bee . . . . *George Macloskie* 353
Mya arenaria in San Francisco Bay . . . . . *Robert E. C. Stearns* 362
The Squid of the Newfoundland Banks in its Relation to the American Grand Bank Cod Fisheries . . . . . *H. L. Osborn* 366
Archæology of Vermont . . . . . *Geo. H. Perkins* 425
Larval Habits of Bee-flies . . . . . *C. V. Riley* 438
Late Explorations in the Gaboon . . . . . *Hugo Von Koppenfels* 447
Pueblo Pottery . . . . . *Edwin A. Barber* 453
Origin and Descent of the Human Brain . . . . . *S. V. Clevenger* 513
The Eastern Snow-bird . . . . . *Samuel Lockwood* 518
Bacteria as a Cause of Disease in Plants . . . . . *T. J. Burrill* 527
Record of American Carcinology for 1880 . . . . . *J. S. Kingsley* 532
Aboriginal Stone-drilling . . . . . *Charles Rau* 536
On the Effects of Impacts and Strains on the Feet of Mammalia . *E. D. Cope* 542
The Great Crested Flycatcher . . . . . *Mrs. Mary Treat* 601
The Reasoning Faculty of Animals . . . . . *Joseph F. James* 604
Progress of Anthropology in America during the year 1880 . . . . *Otis T. Mason* 616
The Manuscript Troano . . . . . *Cyrus Thomas* 625
Variations in a Copepod Crustacean, ... *Carl F. Gissler* 689
Scolopendrella and its Position in Nature . . . . . *A. S. Packard, Jr* 698
American Work in the Department of Recent Mollusca during the year 1880 . . . . . *William H. Dall* 704
Notes on the Codex Troano and Maya Chronology . . . . . *Daniel G. Brinton* 719
On the Development of the Stomata of Tradescantia and Indian Corn . . . . . *Douglass H. Campbell* . . . 761

An Attempt to Reconcile the Differences between Authorities in Reference to the Maya Calendar and certain dates; also to Determine the Age of the Manuscript Troano . . . . . *Cyrus Thomas* 767
The Siphonophores. [III. Physophoridæ—Animals closely related to Agalma.] . . . . . *J. Walter Fewkes* 772
The Loess in Central Iowa . . . . . *R. Ellsworth Call* 782
Notes on the Early Larval Stages of the Fiddler Crab and of Alpheus . . . . . *A. S. Packard, Jr* 784
Reason—A Psychological Distinction . . . . . *Harley Barnes* 789
On the Microscopic and General Characters of the Peach Tree affected with the "Yellows." . . . . . *W. K. Higley* 849, 961
On the so called Chukchi and Namollo People of Eastern Siberia. *W. H. Dall* 857
The Length of Life of Butterflies . . . . . *W. H. Edwards* 868
Notes on the Migrations of Birds . . . . . *H. D. Minot* 870
Sotol . . . . . *V. Havard* 873
The Fauna of the Nickajack cave . . . . . *E. D. Cope & A. S. Packard, Jr* 877
Demerara . . . . . *F. M. Endlich* 937
A Sketch of the Progress of Botany in the United States in 1880 . *C. E. Bessey* 947
Effects of Reversion to the Wild State in our Domestic Animals . *J. D. Caton* 955
Intelligence in a Snail . . . . . *W. H. Dall* 976
Botanical Notes from Tucson . . . . . *Jos. F. James* 978

EDITORS' TABLE.

The United States Geological Survey, 39; Lack of Naturalists in large cities, 41; Academies of Sciences, 41; The New York Times, 42; The Tariff Laws of the United States, 124; Geological Survey of Pennsylvania, 126; Laws of Nomenclature, 219; Government aid for a biological survey of the United States, 302; A proposition that the British Association for the Advancement of Science be invited to hold their annual meeting for 1883 in conjunction with the American Association, 379; Description and Iconography in Biology, 548; Winter course of lectures at the Academy of Natural Sciences of Philadelphia, 549; Letter from James Hall, 550; Insanity and Responsibility, 641; Concord Summer School of Philosophy, 724; Mr. Barnes' Metaphysical Definitions, 791; Mining reports and investments, 791; Rules governing Nomenclature, 883; Biology as a Profession, 987.

RECENT LITERATURE.

The Naturalists' Directory for 1880, 42; Shell Heaps in Japan, 43; The Botany of California, Vol. II, by Sereno Watson, 44; Balbiani's Lectures on the Generation of Vertebrates, 45; Zittel's Hand-book of Palæontology, 46; McAlpine's Biological Atlas, 46; Eaton's Systematic Fern List, 46; The Zoological Record for 1878, 47; Jourdan's Zoantherian Corals of the Gulf of Marseilles, 47; Bastian's The Brain as an Organ of Mind, 48; Mason's Microscopic Studies on the Central Nervous System of Reptiles and Batrachians, 50; Recent Books and Pamphlets, 51; Report of the Commissioner of Fish and Fisheries for 1878, 127; Horn's Synopsis of the Burying Beetles of the United States, 128; Robinson's Flora of Essex county, Massachusetts, 129; Report of the Committee of the Franklin Institute on Analysis of Inks, 129; Outlines of Linguistic Science, 131; Molina's Dictionary of the Aztec Language, 131; Recent Books and Pamphlets, 131; Zittel's Hand-book of Palæontology, 221; Gunther's Introduction to the Study of Fishes, 222; Bruhl's Zoötomy for Students, 223; Ingersoll's Friends Worth Knowing, 223; Gennadios on Phylloxera, 224; Wood's Insect's Abroad, 224; Recent Books and Pamphlets, 224; Wallace's Island Life, 305; Recent Books and Pamphlets, 310; Genth and Kerr's Minerals of North Carolina, 380; Martin's Human Body, 382; Verrill's Cephalopods of the East Coast of North America, 383; Minot's Studies on the Tongues of Reptiles and Birds, 383; Natural History of Coleoptera, 384; Report of the State Geologist of New Jersey, 384; Kingsley's Notes on Crustacea, 384; Recent Books and Pamphlets, 385; Underwood's Native Ferns, 462; Kent's Manual of the Infusoria, 463; Recent Books and Pamphlets, 467; Semper's Animal Life as affected by the Natural Conditions of Existence, 550; Anniversary Memoirs of the Boston Society of Natural History, 552; Brooks' Development of the Squid, 553; Second Report of the U. S. Entomological Commission, 554; Recent Books and Pamphlets, 555; De Quatrefages' The Human Species, 643; The Zoölogical Record for 1879, 646; Our Sporting Journals, 646; Report of the Geological Survey of Canada for 1878–79, 647; Recent Lithological Notices, 647; The Economic Entomology of Ontario, Canada, 648; The Geology of Indiana, 648; Recent Books and Pamphlets, 648; Report of the State Commissioners of Fisheries of Pennsylvania, 726; Studies from the Biological Laboratory of Johns Hopkins University, 727; Hamlin's Physical Geography and Geology of Mt. Ktaadn, 728; Darwin's Power of Movement in Plants, 729; Re-

cent Books and Pamphlets, 730; Hyatt's Genesis of the Tertiary species of Planorbis at Steinheim, 793; Marey's Animal Mechanism, 796; Peirce's Ideality in the Physical Sciences, 799; New England Bird Life, 800; Bronn's Classes and Orders of the Animal Kingdom, Crustacea, 801; Index to Riley's nine Reports on the Insects of Missouri, 801; Recent Books and Pamphlets, 801; Scudder's Butterflies: their Structure, Changes and Life-histories, 885; Newton and Jenney's Geology of the Black Hills of Dakota, 887; A Memoir on the Loxolophodon and Uintatherium, 888; Hervey's Sea Mosses, 890; Bailey's Handbook, 890; Book of the Black Bass, 891; North American Mesozoic and Cænozoic Geology and Palæontology, 891; On the Structure and Development of the Skull in the Batrachia, 892; Recent Books and Pamphlets, 892; Tylor's Anthropology, 990; Knowledge, 995; Recent Books and Pamphlets, 995.

GENERAL NOTES.

Botany.—Relation of Elevation to Change of Color in Flowers, 52; Insect-destroying Fungi, 52; Bennett's Classification of the Cryptogams, 53; Botanical Notes, 54; The Fungi which produce Mildew on Cotton Goods, 132; Allen's Characeæ Americanæ Exsiccatæ, 133; The Pepperidge Tree in Maine, 134; Histology of the Pumpkin Stem, 134; Fertilization of Aquilegia, 134; Progress of Botany in the United States, 135; Botanical Notes, 135; Variations in the Growth of the Virginia Creeper and Hickory, 227; The Compositæ, 227; The Sensitiveness of the Root-tip of the Seedling, 228; Influence of Light on the Respiration of Seeds, 228; Botanical Notes, 229; A Reformed System of Terminology of the Reproductive Organs of the Thallophyta, 311; Curtiss' "North American Plants," 314; The Function of Lichen Gonidia, 315; Sets of North American Fungi, 315; Pinus banksiana Lamb., on the Sea Coast of Maine, 316; Bentham's New Classification of the Orchids, 316; Botanical News, 316; On the Evaporation of Water from Leaves, 385; The Flora of Arkansas, 388; Botanical Notes, 389; A Botanist's Trip to "The Aroostook," 469; Our Species of Cedar Apples, 471; Cohn's Classification of the Thallophytes, 473; Botanical Notes, 474; The Growth of Starch Grains, 556; Hardiness of the Eucalyptus, 558; Curiosities in Tree Growth, 559; Botanical Notes, 560. The Poison of Zygadenus paniculatus, 651; Germination of Astragalus utahensis, 651; How our Red Clover behaves, 651; Sets of North American Algæ, 652; Botanical Notes, 652; Botany in Minnesota, 732; The Study of Algæ in the United States, 732; The Literature of Botany, 734; A Hint to Microscopists, 734; Errata, 735; Botanical Notes, 735; Caruel's New System of Plants, 803; Influence of Severe Winters on Vegetation, 806; Botanical Notes, 806; An Interesting Lady's Slipper, 894; The Conifers of Japan, 895; A Pocket Manual of Botany wanted, 896; Lemna polyrrhiza again discovered in flower on the Detroit river, 896; Botanical Notes, 897; Dimorphism in Black Mustard, 997; Motion of the Fruit of Tilia while in the Air, 998; The Sensitiveness of Tendrils, 999; The Superabundance of Pollen in Indian corn, 1000; The Common Names of our Plants, 1000; Coreopsis rosea, 1000; Ceratophyllum demersum in Fruit, 1001; Botanical Notes, 1001.

Zoology.—Notes on the Land-shells of Dominica, 56; Breeding Habits of the European as Compared with those of the American Oyster, 57; Change in the Nervous System of Beetles during Metamorphosis, 58; A New Genus of Catostomidæ, 59; Cellular Irritability, 59; Budding in Free Medusæ, 59; Zoölogical Notes, 60; Description of a Hermaphroditic Phyllopod Crustacean (Eubranchipus), 136; Habits of the English Sparrows in the United States, 139; Intelligence in a Cat, 140; Curious Habit of a Dragon-fly, 141; Migrations of the Sand-hill Crane, 141; Zoölogical Notes, 142; Dredgings in the Bay of Biscay, 230; Fauna of the Luray and Newmarket Caves, Virginia, 231; A rare Fish in Illinois, 232; The Japanese Lap-dog, 233; The Epidemic among Marine Fishes, 234; The Lac Insect, 235; Deep-water Fauna of the Swiss Lakes, 235; The Poison Apparatus of Spiders, 236; Deep Dredgings in the Lake of Tiberias, 236; Fresh-water Microscopic Organisms, 237; Zoölogical Notes, 237; Value of the House Wren as an Insect Destroyer, 318; Our Social Blue-jays, 319; Zoölogical Notes, 319; New Texan Unio, 390; Note on Succinea campestris and S. aurea, 391; The English Sparrow in Illinois, 392; The Red-winged Starlings, 393; The Indigo Bird, 394; Zoölogical Notes, 394; More about that Cat, 475; Birds out of Place, 476; A Hawk New to the United States, 477; Curious Instance in the Breeding Habits of the Blue-bird, 478; Zoölogical Notes, 478: The king snake (Ophibolus sayi) sups on a full grown water moccasin (Ancistrodon piscivorus), 561; Survival of wild habits in domesticated Cattle, 563, A Dog's discrimination of Sounds, 563; Discoveries in the Anatomy of Crustacea, 564; Effects of different colored light on the growth of Animals, 564; Zoölogical Notes, 564; Brief Notes on some Iowa Birds, 653; The Organs of Smell in Land Snails, 655; The Structure of the Orang Outang, 655; Marine Animals in Aquaria, 656; The Eye-like Organs of the Skin of Certain Fishes, 657; Mason's Microscopic Studies on the Central Nervous System of Reptiles and Batrachians, 657; The Jelly Fishes of Narragansett bay, 658; Zoölogical Notes, 658; A Shower of Cyclops quadricornis, 736; Mussel and Insect Climbers, 737; A Woodchuck climbs a Tree, 737; Carphophiops helenæ in Indiana, 738; Eutænia radix in Indiana, 738; Habits of the Yellow-bel-

lied Woodpecker, 738; Probable cause of the Longevity of Turtles, 738; The Trichina and other Animal Parasites, 739: The Tail in the Human Embryo, 740; New Type of Parasitic Crustacea, 741; Cilia and Possible Nervous System of Infusoria, 741; New Genera of Cuttle Fishes, 742; Note regarding change of color in Diaptomus sanguineus, 742; New Discoveries concerning Deep-sea Crustacea of the Gulf of Mexico, 742; The Musk Sheep, 743; Zoölogical Notes, 743; A Correction, 744; Recent Zoölogical Work in France, 807; Evolution and Hybridism in Ornithology, 808; Breeding Habits of the Fish Hawk, 809; Blackbirds Catching Fish, 810; Habits of the Rocky mountain Axolotl, 810; Systematic Position of Balanoglossus, 811; Unusual Actions of a Hen Turkey, 812; Change of Color in Crabs and Prawns, 812; The Blue Gull, 812; Male Crustacea producing Eggs, 813; Animal Pests in Greenwood Cemetery, 813; Zoological Notes, 813; The Resemblances and Differences of the two Sexes, 899; On the Morphology of the Corbula of certain Plumularidæ, 901; Migration of Birds at Night, 902; Braving the "Blizzards," 903; Snakes Climbing Trees, 904; The Blue Jays, 904; Does the Crow Blackbird eat Crayfish, 904; Avian Riders 905; The Migration of Birds, 905; The Claw on the Index Digit of the Cathartidæ, 906; The Paper Nautilus again in New Jersey, 908; Zoological Notes, 908; The Cœloma Theory, 1002; The Tortoises of Tucson, 1003; Intelligence of a Cat, 1004; Migration of Birds, 1004; Sudden Interest in Japanese Ornithology, 1005; Terns as Fly-catchers, 1005; Asilus and Libellula, 1005; Specimens of Melantho wanted, 1005; Zoölogical Notes, 1005.

Entomology.—Salutatory, 61; Biological Note on Euplectrus comstockii Howard, 61; Oviposition in the Tortricidæ, 63; Supplementary Note on the Food of the Blue-bird, 66; Larval Habits of Bee-flies (Bombyliidæ), 143: Experiments with Pyrethrum: Safe Remedies for Cabbage-worms and Potato-beetles, 145; The Food of Fishes, 147, Insect Enemies of the Rice Plant, 148; Description of a new Species of Cynips, 149; The "Yellow Fever Fly," 150; Ways of Limenitis bredowii, 151; Habits of Xylotrechus convergens, 151; An Aquatic Sphinx Larva, 151; Notes on the Grape Phylloxera and on laws to prevent its introduction, 238; Cecropia Cocoons punctured by the Hairy Woodpecker, 241; Notes on the Elm-tree Leaf-beetle (Galeruca xanthomelæna), 242; Food Habits of Saperda cretata, 244; Hybernation of the Cotton-worm Moth: ease with which mistakes are made, 244; Pyrethrum Seed, 245; The French still looking toward American Vines, 322; Legislation to control Insects injurious to Vegetation, 322; On some Interactions of Organisms, 323; Belgian Entomological Society, 324; Insect Locomotion, 325; Plant-feeding Habits of Predaceous Insects, 325; Notes on Papilio philenor, 327; Anatomy of the Milkweed Butterfly, 329; Entomological Notes, 330; Exuviation in Flight, 395; On some new Tube-constructing Spiders, 396; The Rascal Leaf-crumpler in Georgia, 400; Vertical vs. Horizontal Insect Boxes, 401; Insects Affecting the China Tree, 401; Galls on Eucalyptus, 402; North American Anthomyiadæ, 402; Galls and Gall Insects, 402; The Periodical Cicada, alias, "Seventeen-year Locust," 479; A new species of Oak Coccid mistaken for a Gall, 482: The "Water-weevil" of the Rice Plant, 482; The impregnated Egg of Phylloxera vastatrix, 483; Works on North American Micro-lepidoptera, 484; Moths mistaken for Aletia, 486; Scale Insect on Raspberry, 487; Specific Value of Apatura alicia Edw., 487; Dimorphism in Cynipidæ, 566; Blepharoceridæ, 567; Braula cœca not particularly injurious to the Honey Bee, 568; Economic Entomology in England, 568; The cultivation of Pyrethrum and Manufacture of the Powder, 569; Trees attractive to Butterflies, 572; Hudson bay Lepidoptera, 572; Trade in Insects, 573; Ants Injurious in Arizona, 573; Larvæ of Coleoptera, 574; Covering of Egg puncture mistaken for Dorthesia, 574; Saw-fly, 574; Supposed Army Worm in New York and other Eastern States, 574; Migration of Butterflies, 577; Classification of the Mites, 577; Carrying out the Law, 578; Locusts in Mexico in 1880, 578; Erratum, 578; The Egg-case and Larva of Hydrophilus triangularis Say, 660; The Cultivation of Pyrethrum and Manufacture of the Powder (continued), 744; The Caterpillar Nuisance in Cities: How to Suppress it, 747; Blepharoceridæ, 748; Remarkable case of Retarded Development, 748; Promotion of Silk-culture in California, 749; Locust Flights in Dakota, 749; The Hessian Fly, 750; The genuine Army Worm in the West, 750; A new imported Enemy to Clover, 750; Another Enemy of the Rice Plant, 751; Canker Worms, 751; Lepidopterological Notes, 751; Notes on Hydrophilus triangularis, 814; The Cultivation of Pyrethrum and Manufacture of the Powder (continued), 817; Migration of Plant Lice from one Plant to another, 819; The Chinch Bug, 820; Phylloxera Laws, 821; One half the Vine area of France affected by Phylloxera, 821; London Purple and Paris Green, 821; Entomologist for the Pacific Coast, 821; Dilar in North America, 822; Locusts in Nevada, 822; Odor in Butterflies, 822; Entomology at the recent meeting of A. A A. S., 822; The Permanent Subsection of Entomology at the recent meeting of the A. A. A. S., 909; The New Imported Clover Enemy, 912; Crambus vulgivagellus, 914; Larval Habits of Sphenophori that attack Corn, 915; Effects of Drought on the Hessian Fly, 916; Simulium from Lake Superior, 916; Coleopterous Cave Fauna of Kentucky, 916; Hemipterological Studies, 917; Entomology in Buffalo, N. Y., 917; Lampyridæ, 917; Severe Cold and Hibernating Apple-worms, 917; Retarded De-

velopment in Insects, 1007; Preparation of Diptera, 1008; The Permanent Subsection of Entomology at the recent meeting of the A. A. A. S., 1008; Another Herbivorous Ground-beetle, 1011; A Disastrous Sheep Parasite, 1011; Phylloxera not at the Cape, 1011; Resistance of Grape-vines to Phylloxera in sandy Soil, 1012; Locusts in the West, 1013; Structure of the Claw in Psocina, 1013; Insect Collection for Sale, 1014.

Anthropology.—Matériaux pour l'Histoire de l'Homme, 68; Anthropology in Austria, 68; Anthropology in Italy, 69; Archiv fur Anthropologie, 69; Anthropology in Mexico, 70; British Periodical Literature and Anthropology, 70; Comparative Theology, 70; Archæological Explorations at Madisonville, Ohio, 72; The Revue d'Anthropologie, 73; Bibliography, 73; Early Man in Britain, 151; The Anthropological Society of Paris, 153; Fossil Men and their Modern Representatives, 154; Gesture Signs, 155; Report on Indian Affairs, 155; Transactions and Proceedings of the New Zealand Institute, 155; Asiatic Culture in America, 156: A new Periodical, 156; Skin Furrows on the Hand, 156: Ethnography of the Caucasus, 156; Population of the Earth, 156; German Anthropology, 157; Corrections, 157; Bibliography, 157; Anthropology in Missouri, 245; The Study of Indian Languages, 248; A Prehistoric Rock Retreat, 248; Antiquity of Man, 249; The Aztec Dictionary of Father Alonzo de Molina, 249; The Indo-Chinese and Oceanic Races, 250; The Pawnee Indians, 250; The Western Reserve Society, 250; The Census of Alaska, 251; The Davenport Academy, Iowa, 251; Anthropology in France, 331; The History of Religion, 332; German Anthropology, 333; The Trenton Gravels and Early Man, 333; Mica Veins, 333; The American Antiquarian, 333; The Bronze Age in Germany, 334; Anthropology in Great Britain, 334; Bibliography, 335; The People of Alaska, 403; Landa's Alphabet, 404; The Historical Society of Wisconsin, 405; America and the East, 405; Harvard Library Bulletins, 405; Antiquities of Peru, 405; Anthropology in France, 405; Sepulchral Mound and Costume in Japan, 406; Ethnography and Philology of America, 407; Anthropology in Germany, 487; Anthropology in France, 488; The Egyptian Stone Age, 488; Pre-historic Illinois, 489; Ancient Works in New York, 489; The American Antiquarian, 490; German Anthropology, 490; Anthropology in Great Britain, 490; Bibliography, 491; Archæological Researches in Nicaragua, 578; Wild Rice in Europe, 580; Norse Mythology 580; Inscribed Stones, 581; American Philosophical Society, 582; Cruise of the "Corwin" in Behring sea and the Arctic ocean, 582; Chavero, Alfredo, 582; The Victoria Institute, 582; Congress of Americanists, 582; Anthropology of the East Indies, 583; Bibliography, 583; Comparative Biology, 663; The British Association in 1880, 665; Anthropology in Berlin, 665; Italian Anthropology, 666; The American Antiquarian, 666; Politico-social Functions, 666; Bibliography, 666; The Sacrificial Stone of the City of Mexico, is it Genuine or not? 752; Ancient Pueblo Workshop, 754, French Anthropology, 754; German Anthropology, 755; Bibliography, 755; The Indians of Berks county, Pa., 822; Anthropological Institute of Great Britain, 823; Harvard University Bulletin, 824; The Archæological Institute of America, 824; Anthropology in New Zealand, 825; Zuni and the Zunians, 826; The Indians of Canada, 826; Bibliography, 827; Temporal Process of the Malar Bone in Ancient Human Crania, 917; A Prehistoric Cup made from a Human Cranium, 918; Anthropology at the American Association, 919; Anthropology in France, 920; Professor Baird's Report for 1880, 1014; Peabody Museum of American Archæology and Ethnology, 1014; Changes in Mya and Lunatia since the deposition of the New England Shell-heaps, 1015; Ancient Japanese Bronze Bells, 1015; Worked Shells in New England Shell-heaps, 1016; Congres et Missions Ethnographiques, 1016; Italian Anthropology, 1017.

Geology and Palæontology.—The Vertebrata of the Eocene of the Wind River Basin, 74; Professor Kerr on Frost Drift, 75; Discoveries of Minerals in Western North Carolina, 76; Geological News, 78; Geology of Southeastern Pennsylvania, 161; Alleged changes in the relative elevation of Land and Sea, 162; Catalogue of Vertebrata of the Permian formation of the United States, 162; Geological News, 164; Apparent Glacial deposits in Valley Drift, 251; Extinct Palæozoic Fishes from Canada, 252; The Millstone Grit in England and Pennsylvania, 253; A new Fossil Bird, 253; The Stream-tin Deposits of Blitong, 253; Geological News, 254; Mammalia of the Lower Eocene Beds, 337; The Fault of the Yankee Hill Silver deposit of Leadville, Colorado, 338; Filhol on Proælurus, 339; The Classification of the Perissodactyla, 340; Geological News, 340; Discovery of the Preglacial Outlet of the Basin of Lake Erie into that of Lake Ontario, 408; The Iron Ores of Southern Utah, 410; Geological News, 412; The Taconic System in Geology, 494; A Fossil Phyllopod Crustacean from the Quaternary clays of Canada, 496; Miocene Dogs, 497; Reinsch's Microscopic Investigations of the Structure of Coal, 497; Geological News, 500; Fossils of the Iowa Loess, 585; The Rodentia of the American Miocene, 586; A New Clidastes from New Jersey, 587; The International Geological Congress, 588; Gaudry on Stereorhachis, 588; Diller's Felsites of the Region of Boston, 589; Geological News, 589; The Temporary Dentition of a New Creodont, 667; A Laramie Saurian in the Eocene, 669; Colors of Geological Maps, 670; Geological News, 671; Mammalia of the Lowest Eocene, 829; Geology of the Lake

Valley Mining District, 831; A Fossil Tertiary Crayfish, 831; Geological Notes, 835; Eocene Plagiaulacidæ,921; Belodon in New Mexico, 922; Geological Notes, 923; A new type of Perissodactyla, 1017; New genus of Perissodactyla diplarthra, 1018; Notes on Creodonta, 1018; The Permian formation of New Mexico, 1020; New Carboniferous Fossils in Scotland, 1021; Stegocephali in Saxony, 1022; Fossil Organisms in Meteorites, 1022; Geological News, 1023.

Geography and Travels.—The Explorations of Capello and Ivens in West Central Africa, 78; Col. Prejevalsky, 81; The East Central African Expedition of the Royal Geographical Society, 165; African Exploration, 166; Franz-Josef Land Revisited, 254; Voyages in Behring Strait in 1880, 341; Lake Tanganyika, 344; Siberia in Europe, 413; Col. Prejevalsky, 415; M. de Brazza's Journey from the Ogowe to the Congo, 415; Stanley on the Congo, 416; African Exploration, 417; Important Discoveries in South America, 500: Franz-Josef Land Revisited, 502; The Third International Geographical Congress, 504; African Exploration, 590; Geographical News, 593; East Central Africa, 672; West Central Africa, 675; Geographical News, 676, 756; The Imperial Gazetteer of India, 835; The Arctic Campaign of 1881, 837; The Ogowe and Congo Routes to Stanley Pool, 924; The Great Andes of the Equator, 926; Geographical News, 928; Proceedings of the Geographical Section of the British Association, 1024; Hudson's Bay, 1027.

Microscopy.—Adulterations of Drugs, 82; Hard Rubber Zoophyte Trough, 83; The Acme Microscopes, 83; The Spencer Objectives, 84; Gutta Percha Cells, 84; Fertilization by Means of Pollen-tubes, 168; American Microscopical Society of the City of New York, 169; Pathology of Acute Delirium, 258; Fine Rulings, 259; Ye Microscope of ye Olden Time, 260; Abnormal Entozoa in Man, 260; Exchanges, 260; A new Fine Adjustment, 346; New Method of Dry Mounting, 346; Mounting in Copal Varnish, 346; Importance of Stating Magnifying Power used, 347; American Society of Microscopists, 347; Examination of Metalliferous Clays, 418; Arranging Small Objects on Slides, 419; The Hartnack Microscopes, 419; New Sea-side Laboratory, 419; Microscopic Objects, 420; Test Objects. Amplifier, 506; Recent American Books on Microscopy, 595; Prizes for Microscopical Essays, 597; The Blood in Hibernation, 677; Mounting Starches, 678; New Microscopical Journal, 678; Recent Pamphlets, 678; Society Notes, 678; Micrographic Tracings, 757; Sea Mosses, 758; Angular Aperture, 758; Meteoric Dust, 839; Microscopy in the American Association for the Advancement of Science, 840; New Freezing Microtome, 841; Mounting Chick Embryos whole, 841; Examination of Carbon Dioxide in the fluid cavities of Minerals, 929; Death of Charles A. Spencer, 931; American Society of Microscopists, 1028; Verification of Objectives, 1029; Mounting on Square Slips, 1029; Microscopic Test for Poison, 1029; Slides of Marine Algæ, 1030.
